

SAIIE 2009 CONFERENCE
INNOVATION IN INDUSTRIAL ENGINEERING

28 - 30 October 2009

Roodevallei Country Lodge, Pretoria

Conference website: www.saiie2009.co.za

The world is demanding change. Change in our thinking, change in the way we work and change in the way we employ resources. Business expects innovation to thrive in a highly competitive global economy. What does *Innovation* mean to the Industrial Engineer in South Africa? At the 2009 SAIIE Conference you will find answers to this question by sharing current practice and research with like-minded Industrial Engineers.

We are happy to announce the first peer-reviewed SAIIE conference in 2009! Delegates are offered two tracks for submission of papers: the *applied engineering track* and the *academic track*. Papers submitted for the applied engineering track will be approved on submission of the abstract only. Papers submitted for the academic track will be approved by peer review on submission of the full paper, and published in the conference proceedings. The colloquia in 2008 were highly successful and we continue our discussions in 2009 on relevant topics of interest lead by panels of experts.

Here are a few great reasons why you should attend the 2009 SAIIE Conference:

- Industry experts and keynote speakers will *share their experience* and knowledge in Innovation;
- You can *benchmark* current best practice in the manufacturing and resources sectors;
- Top *academics* will showcase current research and ideas;
- You have the opportunity to *network* with like-minded professionals in your sector;
- *Young* professionals and students will learn more of the profession;
- You earn *CPD points*;
- The colloquia offer opportunity for *peer discussion* on relevant topics;
- It offers an opportunity for *publication* by peer-review in your discipline; and
- You *contribute* to the future development of Industrial Engineering in South Africa.
