

Dr Dino Petrarolo

Shatterprufe

Dino started his career in 1988 with the Highveld Steel Group, where he took on various operational management and support roles. After a brief period in consulting, he joined the South African Breweries in 1997 where he fulfilled various Manufacturing Development roles before his appointed in 2005 as Group Head: Manufacturing Development for SABMiller plc, responsible for Global manufacturing development and knowledge management related processes.

In July 2008, Dino took on the position of Managing Director of Shatterprufe where he is responsible for the business performance of the automotive glass division of the PG Group, which supplies automotive glass to the Original Equipment Manufacturers of vehicles in South Africa, as well as to local and export after-markets. Dino is also a board member of the PG Group, a major manufacturer and distributor of flat glass products in Africa.

Dino obtained both his MSc and PhD Degrees in Industrial Engineering from the University of the Witwatersrand (Johannesburg). He also holds a BSc. degree in Computer Science and is registered as a Professional Engineer in South Africa, as well as a Chartered Engineer in the UK. In 2008, Dino received the international Martin K. Starr Excellence in Production and Operations Management Practice Award for recognition of major contributions to the field of Production and Operations Management (POM) by POM practitioners.

His experiences include the development and implementation of Operational Strategies, World Class Manufacturing (WCM), Supply Chain Development related change and improvement initiatives, as well as hands on experience in operational management.
